Other missing data Facebook likely holds about users
Weitere fehlende Daten die Facebook vermutlich hat

1. Content users were posting on other peoples sites
2. Meta data of videos
3. The information that users "liked" certain content
4. Information about my browser type, as listed in Facebook's privacy policy
5. Information about my interaction with advertisements (as listed in the privacy policy)
6. Information gathered through "conversation tracking" (as listed in the privacy policy)
7. Information that "indicates a relationship" with other users (as listed in the privacy policy)
8. Information about pictures that users used to be tagged in, but removed my tag from.
9. "Tracking information" that Facebook Ireland gathered from users interaction with other websites, such as when I clicked on a "like"-Button, or loaded the plug-ins from Facebook.
10. Information about "Searches" that users made through the "search" function.
11. Information about settings such as the newsfeed settings
12. Information about "click flows" and the visits of individual pages of the platform
13. Information about the use of personal data in the "friend finder" functionality
14. A disclosure about the use and outcome of any processing of users' data, such as "matching" processes, face recognition or targeting for advertisement.
15. Information about the use of pictures for Facebook's new "face recognition" tool, or the outcome of such a process (such as biometrical data that may be used to identify users).
16. Data that Facebook gathered about users (e.g. phone numbers) when other people "synchronized" a device (e.g. iPhone) with Facebook.
17. More detailed information about users' relationships to other users. Facebook Ireland is e.g. asking users where they know each other from or they track how often users interact.
18. Information on individual content I was posting that indicates the reaction of other users.
19. Information about "invitations" to groups, events or pages users sent to other users.
